

BASIC LIFT SAFETY

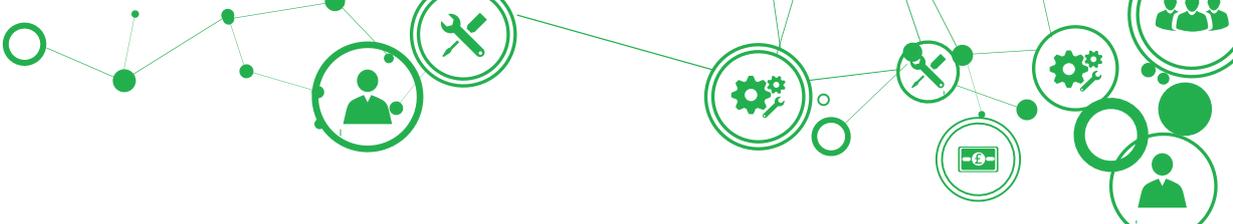

EOR202N BASIC LIFT SAFETY

Ideal for: People that need to access lift equipment, move the lift or to release trapped lift passengers.

STRATEGY

One-on-One Consultation

If you need to release trapped lift passengers from broken down lifts, move a lift, or access lift equipment, then the Lift & Escalator Industry Association approved certificate for Geared Traction Lifts and Electro-Hydraulic lifts, is the EOR202N Working Safely in an Engineering Environment (Lift Safety). We will design and supply the right training materials and assess your skills against Nationally Recognised Standards, our work is delivered in the workplace, in the classroom and online.

IMPLEMENTATION

Registration/Induction

We will register each candidate with LEIA in order that the assessment of your training can be certificated to the EOR202N Standard. Induction is also carried out where all training manuals will be issued to you.

Health & Safety Training

We will supply theory training in the classroom covering the Health & Safety at Work Act, PPE at Work Regulations and BS7255 Safe Working on Lifts, we also teach lift component identification.

Onsite Lift Training

We will deliver practical handwind training onsite on your very own lift equipment to cover access and egress procedures for getting on top of lift cars and in lift pits for both Traction & Hydraulic Lift arrangements.

EOR202N Assessment

We will come to see you onsite and observe you in the workplace to assess your new skills in relation to the EOR202N standard. This follows the theory and practical training that we deliver.

Verification Sign Off

Ultimately your work will need to be presented to an Approved Verifier in order for the EOR202N to be claimed. We take care of all administration work and any items that sometimes arise from auditing feedback.

Certificate & Auditing

EOR202N certificates will be claimed direct from LEIA and sent to you. All paperwork used throughout the training will be kept for 12 months for auditing purposes, after this time everything is returned to you.
